While this is more One-Hit Wonders than we'd expect to see, it does not appear to have a significant impact on the overall rating. 3.0/5 from one-hit wonders 3.4/5 from reviewers with more than one review 5% have zero verified purchases 4 of the 83 reviewers have never written a verified purchase review. The Never-Verified Reviewers have rated this product an average of 5.0 while the reviewers who have written at least one verified purchase review rated this product an average of 3.3. Based on our statistical modeling, the discrepancy in average rating between these two groups is significant enough to believe that the difference is not due to random chance, and may indicate that there are unnatural reviews. Warn Deleted Reviews 3 Reviews have been deleted We discovered a total of 3 deleted Reviews for this product, with an average rating of 4.7. Even though deleted reviews don't affect the average rating, the fact that action was taken to delete reviews raises some red flags about the integrity of the reviews for the product as whole. There are a few limitations to keep in mind regarding the Deleted Reviews test: We don't have a magic ability to collect every single deleted review; we can only identify reviews as deleted if we collect them on one date and then notice they are no longer visible on a subsequent date.We have no information on reviews that were never published in the first place.We also don't know why these reviews were removed. It could be action from the platform, personal decision by the review author, part of an entire account closure, even some data error on our part, etc. Read more about our Deleted Reviews test. Pass Rating Trend 0% Created on high-volume days We counted 83 reviews for this product over the span of 1,133 days, an average of 0.1 reviews per day. If these reviews were created randomly, there would be a 99.9% chance that we would see 2 or fewer reviews on any given day. We didn't find any days exceeding this threshold. Read more about our Rating Trend test. Pass Unverified Purchases 6% Unverified Purchases 5 of the 83 total reviews for this product are unverified purchases. This is within an acceptable range and it does not appear to be significantly affecting the overall rating for this product. 4.2/5 from unverified purchasers 3.3/5 from verified purchases Unverified purchases may be the result of Kindle Unlimited readers, buyers who didn't pay full price, or reviewers who did not purchase the product at Amazon. Read more about our Unverified Purchases test. Pass Word Count Comparison 0% Have an overrepresented word count Pass Reviewer Ease The ease score is the average rating for all reviews that a given reviewer submits. The average ease score for reviewers of this product is 3.4, while the average ease score for reviewers in this category is 4.2.
